Projects & Work Experience

Software Developer Intern at Algo IQ Software Solutions

Worked for 6 months on the Ionic framework which included Typescript, HTML/CSS, and SQL. Helped in converting one of their application from Ionic 4 to Ionic 5.

- **Duration:** 6 Months

Travel Agency Management System

Developed an online booking & payment system for Michael Travels, a travel package booking company, to enable customers to easily book their travel packages and make secure online payments.

- **Front-End:** Java
- **Back-End:** MySQL
- **Duration:** 3 Months

Bus Ticket Reservation System

Developed & implemented a digital bus reservation system to streamline & automate the booking process by effectively managing data & providing users with a seamless experience compared to traditional booking methods.

- **Front-End:** HTML/CSS, JavaScript
- **Back-End:** MySQL
- **Duration:** 2 Months

Online Expense Tracker

Developed an online expense tracker application that helps users to track their daily expenses in an organized way, enabling them to gain insights into their spending habits and better manage their finances.

- **Front-End:** HTML/CSS, JavaScript
- **Back-End:** MySQL, PHP, Apache Server
- **Duration:** 2 Months

Cooking Recipe Android App

The goal of this project was to simplify cooking for users by providing easy-to-understand recipes that result in great-tasting food. The app is designed to guide users through the cooking process with step-by-step instructions, making it accessible even for beginners.

- **Front-End:** Java
- **Back-End:** SQLite
- **Duration:** 1 Month
